Portfolio: reyestristan.github.io

OBJECTIVE

Final-year Computer Engineering student at Jose Rizal University and Dean's Lister, with hands-on experience in machine learning, web development, and database design, backed by AWS Academy and CompTIA certifications. Seeking an OJT opportunity in software development, data, or IT systems where I can apply my technical skills and learn from experienced engineers.

EDUCATION

Bachelor of Science in Computer Engineering 2023 – Present
Jose Rizal University | Expected Graduation: 2027

Senior High School 2021 – 2023
Pateros Catholic School

Junior High School 2017 – 2021
Pateros Catholic School

Elementary 2011 – 2017
Pateros Elementary School

ACHIEVEMENTS

- Dean's Lister, First Semester, A.Y. 2025–2026 (Jose Rizal University)
- Dean's Lister, Second Semester, A.Y. 2025–2026 (Jose Rizal University)

PROJECTS

Printstant: Print Queue and Shop Management Platform | *Venture Viability Analysis, Wadhwani Foundation*

- Member of a 3-person venture team that designed a web platform letting students upload files remotely, track print queues in real time, and get automated price quotes from nearby print shops.
- Handled marketing, contributing to a go-to-market plan built on social media (Facebook, Instagram, TikTok), campus flyers, and direct pitches to print shop owners.
- Validated the problem through 10 in-person interviews and tested a working web prototype with 3 users, all of whom rated it positively. The venture scored a 93.33% Venture Viability Index.

Lip Condition Classification Using CNNs | *Research Paper*

- Co-authored a study comparing EfficientNetB0 (transfer learning) against a custom Vanilla CNN to classify lip images as Chapped, Healthy, or Medical.
- EfficientNetB0 reached 88.89% test accuracy versus 73.33% for the Vanilla CNN, using two-phase training, data augmentation, class-weight balancing, and L2 regularization.
- Evaluated with confusion matrices and ROC-AUC curves, and exported both models to TensorFlow Lite for potential mobile deployment. Tools: Python, TensorFlow/Keras, scikit-learn.

PROJECTS (CONTINUED)

Barangay Poblacion Portal | *CPE C315 Final Project*

- Co-developed a multi-page barangay web portal in HTML, CSS, and JavaScript where residents can read community news, request barangay documents, file complaints, and look up hotline numbers.
- Built add, edit, and delete features for document requests and complaints, with entries saved in the browser's local storage.

Laboratory Borrowing Portal | *Software Design Project*

- Co-developed a web portal with a 4-person team to replace the paper-based equipment borrowing process in the university's computer laboratory, with separate borrower and custodian views.
- Borrowers sign in with Google, check item availability, submit borrow requests, and track their history; custodians approve or reject requests and manage inventory from a dashboard.
- Produced the full design package (needs and requirements analysis, flowchart, database schema, wireframes) and a working app built with Python (Flask), Google OAuth, and Supabase.

CERTIFICATIONS

- Introduction to AI Literacy and Responsible Use, CHED ACHIEVE Micro-credential with Mapúa University (September 2026)
- Effective Speaking and Listening Skills (US English), Wadhwani Foundation Microcertificate (August 2026, 75 hours)
- Ignite Philippines, Wadhwani Foundation: Certificate of Content Completion (April 2026, 42 hours)
- AWS Academy Graduate: Machine Learning Foundations (April 2026, 20 hours)
- Huawei ICT Academy: Overview of AI, Certificate of Completion (March 2026)
- Relational Database Developer Certification, freeCodeCamp (November 2025, approx. 300 hours)
- CompTIA Tech+ (September 2025)

SEMINARS AND WORKSHOPS

- 3D Printing Workshop (September 15, 2026)
- UI/UX Seminar (October 10, 2023)

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML, CSS, SQL

Databases: MySQL, Supabase

Libraries and tools: scikit-learn, TensorFlow/Keras, Flask, Google Colab

Concepts: Machine learning, deep learning, image classification, relational database design
